

Lakefield College School | UNIVERSITY GUIDANCE

Class of 2025 University Admissions Profile

University guidance at Lakefield College School is aimed at counselling students on appropriate university choices after they graduate, in relation to their academic achievements and interests.

The report that follows shows the destinations of Lakefield College School graduates from the Class of 2025, and summarizes the data on this particular class. The University Admissions Profile is updated annually, and provides a record of where our graduates go to university.

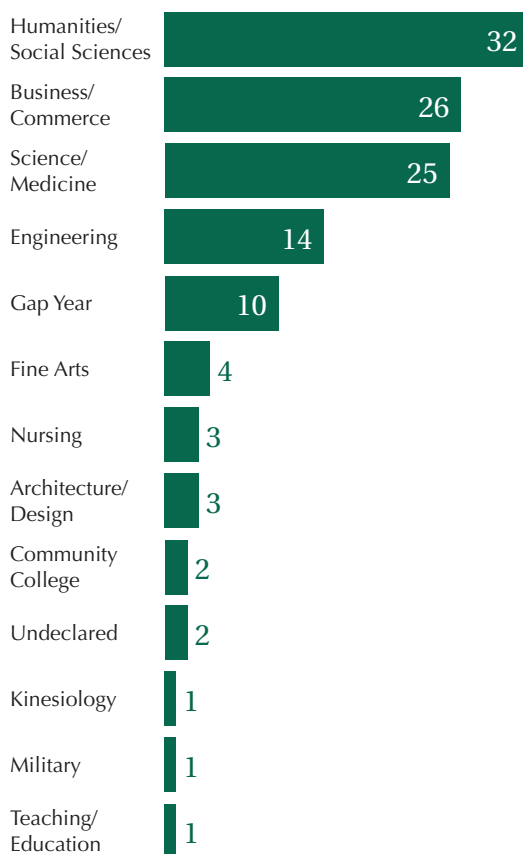

University Destinations of Graduating Students 2021-2025

Observations Concerning University Guidance and Applications

Guiding students toward the best post-secondary choice for their individual needs – this is the task of the university guidance counsellors at Lakefield College School. Our guidance team work with students from the time they arrive on campus until the day they graduate, helping them not just to choose courses and complete applications, but to understand their strengths, skills and abilities, explore careers and set goals for themselves.

By the time students are in their graduating year at Lakefield College School, they will have researched various career options, interviewed people working in the profession to which they aspire, developed a detailed resume outlining their volunteer experiences, extracurricular activities, and personal strengths, and identified a variety of compelling post-secondary options. Interested students in Grade 11 have the opportunity to enroll in additional sessions that outline the procedures and expectations for applying to schools in the United States and/or the United Kingdom, and can receive individualized SAT tutoring.

In their Grade 12 year, students meet with their guidance counsellor regularly, both in small groups and one-on-one, to research university and college options, prepare applications and personal statements, and eventually make a decision about which post-secondary offer to choose. Guiding a student through the maze of online applications and supplements is challenging but satisfying work.

The majority of our students proceed directly to university after high school and some find best fit academic programs in a college setting. Some LCS students choose to explore the world first and elect to take a gap year, before enrolling

in university. Our gap year adventurers usually return with greater certainty about their chosen program and with newfound maturity.

The statistics for those students who have chosen to enter university show about 20% of students choosing science/medicine programs (equal to the previous year), and about 26% choosing humanities/social sciences options (25% in the previous year). Engineering programs attracted 11% of our students, as compared to 15% in 2024, while the percentage of students choosing business programs dropped slightly to 21% from 22% in 2024.

The number of students attending universities outside Canada represents 25% of the graduating class. Of this group, 13 are studying at universities in the United States, including Boston University, Northwestern University, and the University of California Los Angeles. The other eighteen students have enrolled in universities in the United Kingdom, Europe and New Zealand, with graduates attending such schools as King's College London in England, the University of Edinburgh in Scotland, and the University of Amsterdam in the Netherlands.

Within Canada, our students found campuses coast to coast that meet their individual needs, from the University of British

Columbia in the west to Dalhousie University in the east. While Queen's University and the University of British Columbia together attracted more than a fifth of our graduates, other prominent Canadian universities also garnered a great deal of interest. Nine students chose Western University, eight chose the University of Toronto, and Dalhousie also welcomed eight of our graduates. In all, the Class of 2025 have enrolled in 22 different Canadian universities.

Of course, most universities hope that a lucrative scholarship offer will help to persuade a bright student to attend their institution, and an impressive number of Lakefield College School students were pursued in this manner. According to the information received from our graduating students, at least 82% of the Class of 2025 were offered a scholarship, with award offers totalling \$3.2M.

As guidance counsellors, we are delighted with our students' accomplishments, and we continue to seek ways to assist students in exploring their options and making good choices. To ensure we best serve our students, we use multiple methods of engagement internationally to stay current on admission requirements, program offerings, and campus life. Lakefield alumni are also an invaluable resource, as they let us know their experience of a particular campus or program.

Guiding students toward a sound decision, nonetheless, is very much a one-on-one process. Many issues need to be explored: academic interests are paramount, but factors such as campus culture, athletic and extracurricular opportunities, reputation, geographical location, political landscapes, visa procurement and cost are also important. Lakefield's mission, "To challenge and enable students to reach their individual potential in mind, body and spirit," encourages our students to have high expectations of a university environment. As well-rounded students prepared to assume leadership roles and to participate in a broad range of extracurricular and athletic activities, they seek institutions that will allow them to flourish not only intellectually but also personally.

No summary can do justice to the individual achievements represented in this report. Lakefield College School is indeed proud of its graduating students of the Class of 2025, and we wish them well as they undertake the next stage of education, wherever they may be. We encourage them to keep in touch with us at Lakefield – especially during their first year, when questions may arise. We continue to be interested in their welfare and are always happy to hear from them. Our email addresses are included with this profile – for students, parents, and others.

Congratulations and Best Wishes to the Class of 2025
